

Joseph Gandy

Remote Frontend Web Engineer

joe@gandy.ws | joegandy.co.uk | github.com/JoeGandy | log.jiy.io

Profile

Frontend Web Engineer with 9+ years' experience building and scaling e-commerce and SaaS platforms. Skilled in React, Next.js, TypeScript, Tailwind CSS, and modern frontend tooling. I've worked across the stack, modernised legacy systems, and mentored teams—but I'm also a tinkerer at heart. Whether it's streamlining analytics for millions of users or building out a SaaS app from scratch, I like solving problems and making things that actually work.

Experience

ASOS plc — Senior Web Engineer

Feb 2023 – Present

- Modernised analytics with a new datalayer, replacing scattered scripts and giving product and marketing teams reliable reporting.
- Integrated a new advertising platform into the ASOS site, working with product managers and ad partners to launch smoothly.
- Mentored junior engineers through pair-programming and reviews, helping them ramp up quickly.

ASOS plc — Web Engineer

May 2021 – Feb 2023

- Built and maintained product page features using React.js with an Express.js backend.
- Supported team growth by mentoring newer engineers and sharing best practices.
- Partnered closely with designers and product managers to ship features used by millions of customers worldwide.

Slimming World Ltd — Full-stack Developer

Apr 2018 – Apr 2021

- Built CRM applications with React.js, TypeScript, and .NET Core APIs, styled with Tailwind CSS.
- Took on the Scrum Master role within the team, improving sprint planning and delivery flow.
- Delivered new features that improved the member experience and streamlined internal workflows.

Adaptive Web Ltd — Senior Drupal Developer

Jul 2016 – Apr 2018

- Developed headless CMS solutions using Drupal + React.js.
- Built an in-house DevOps toolkit with Docker and Fabric, making project setup quicker across the agency.
- Helped the team adopt Agile practices, moving towards structured sprint cycles.

Adaptive Web Ltd — Drupal Developer

Jun 2014 – Jul 2016

- Developed custom Drupal 7 modules for enterprise clients.
- First exposure to Agile practices (scrum, sprint planning), learning how teams actually get stuff done.

Education

University of Nottingham — BSc Computer Science (2:1)	2013–2016
Derby College — Software Development Extended Diploma, D*D*D*	2011–2013

Technical Skills

Frontend: React, Next.js, TypeScript, Tailwind CSS, Sass/SCSS

Backend & APIs: Node.js, .NET Core, REST APIs, PHP

DevOps & Tools: Docker, Git, CI/CD, Fabric

Practices: Agile (Scrum Master), TDD, Pair Programming

Projects & Portfolio

Lawnsy — SaaS app for smart lawn-care scheduling, built with Supabase + Next.js + Tailwind CSS. Designed the data model, authentication systems, and scheduling logic, all deployed via CI/CD. lawnsy.io

RMap — Auto-generating React/Gatsby map for Old School RuneScape, featuring dungeon routes, monster locators, and region-highlighting. rmap.uk

ShareX Custom Upload — Self-hosted PHP uploader compatible with ShareX, enabling seamless uploads of text, images, and files.
